Projects

PBH E-Commerce Project

Built using React, Node, Express and MongoDB

An E-Commerce platform for my family footwear business. This fully functional web application has User Authentication, Cart functionality, Admin Portal, Payment Gateway, Product Search and Reviews.

Portfolio Project

Built using HTML, CSS, JQuery and Bootstrap

In this fully responsive, accessible & SEO friendly portfolio along with Bootstrap I used various frontend concepts like CSS grid, Flexbox, CSS animations, gradients and more.

Web Development FAQ

A Voice Assisted FAQ application is built for all aspiring Web Developers.

 Built with Alan AI, React and Chakra UI this FAQ application is intuitive, responsive and answers all Web Development questions using voice commands. As a bonus it also supports voice assisted theme toggling.

Burger Builder

Built using React, Redux & Firebase

A fully functioning Burger Builder application to build, customize, review and place your order. Armed with features like User Sign-in, Orders Summary, Dynamic form generation and validation etc.
